Description. Library classification is an aspect of library and information science.It is distinct from scientific classification in that it has as its goal to provide a useful ordering of documents rather than a theoretical organization of knowledge. Although it has the practical purpose of creating a physical ordering of documents, it does generally attempt to adhere to accepted scientific ...

This module provides regular expression matching operations similar to those found in Perl. Both patterns and strings to be searched can be Unicode strings (str) as well as 8-bit strings (bytes).However, Unicode strings and 8-bit strings cannot be mixed: that is, you cannot match a

Unicode string with a byte pattern or vice-versa; similarly, when asking for a substitution, the replacement ...
