Hi I'm doing a timing plate adjust procedure on a Volvo d13a engine and need the measurement to check the timing gear backlash after setting up the timing plate with two feeler gauges, it's the measurement that is taken at the double idler gear with a dial gauge after the timing plate is set up. Thanks for any help you can give, cheers Chris.

Volvo Trucks

Turn the engine over until cylinder #2 exhaust valve closes and intake valve JUST starts to open. Just as #1 and #6 pistons were at TDC together #2 and #5 pistons are now at TDC. It will take 2 rotations of the engine to adjust all of the valves. Every 120 degrees of crankshaft rotation will position the engine properly for each adjustment.
