Antibiotics - Are They Curing Us or Killing Us ...

It is estimated that drug-resistant strains of bacteria are responsible for approximately 5,000 deaths a year here in the UK, and as much as 25,000 deaths a year in Europe. This is the subject of a new book by John McKenna, a retired medical doctor, who has since been practising natural medicine for 25 years. His new book titled, 'Antibiotics: Are they curing us or killing us?' looks at the threat of antibiotic resistance and how we can take responsibility as individuals to slow the increase ...

Antibiotics Are They Curing Us Or Killing Us

There is no one type of antibiotic that cures every infection. Antibiotics specifically treat infections caused by bacteria, such as Staph., Strep., or E. coli., and either kill the bacteria (bactericidal) or keep it from reproducing and growing (bacteriostatic). Antibiotics do not work against any viral infection. When To Use Antibiotics
