Get Free Boostio C Network Programming Boostio?

Asynchronous programming is now becoming a must and apparently all languages are creating resources to make such programming paradigm easier or, at least, less hard. In C++, the standard and multiplatform approach is to use Boost.Asio, which is detailed in the book.

Boostio C Network Programming - eventerse.mguimaraes.co

Network functions are a perfect use for asynchronous operations because the transmission of data over a network may take a long time, which means acknowledgments and errors may not be available as fast as the functions that send or receive data can execute. Boost.Asio provides many I/O objects to develop network programs.
