Evolvable systems : from biology to hardware : 5th ...

Evolvability is defined as the capacity of a system for adaptive evolution.

Evolvability is the ability of a population of organisms to not merely generate genetic diversity, but to generate

The Highly Optimized Theory (HOT), originally applied to technological systems, argues that evolvable systems are robust against common perturbations, but they show fragility against unusual ones (Carlson and Doyle, 2000). When applied to RTK networks, HOT predicts resistance to interceptions of individual components
