A brief history of the Harley-Davidson Evolution Engine

Crankcase pressure is essentially cycling between atmospheric and negative (pressures) as the pistons go down and back up. (remember, due to the common crankpin 45 degree design, a Harley motor is a variable volume crankcase, unlike most motors) 8) This creates splash oil which is bounced about in the crankcase.

EVO: Oiling & Lubrication - Sportsterpedia

"It really wasn't until the Evolution bikes came along that Harley-Davidson was considered to be a company that had gotten their act together. These bikes sold really well from the start," Krummel recalls. Due to the Evolution engine's all-aluminum construction, there were a few problems early on with finding the right bottom end gaskets.
