Summary. Winbox is a small utility that allows administration of MikroTik RouterOS using a fast and simple GUI. It is a native Win32 binary, but can be run on Linux and MacOS (OSX) using Wine. All Winbox interface functions are as close as possible mirroring the console functions, that is why there are no Winbox sections in the manual.

Manual:Winbox - MikroTik Wiki

Connect Routers ether1 port to the WAN cable and connect your PC to ether2. Now open WinBox and look for your router in neighbor discovery. See detailed example in Winbox article. If you see the router in the list, click on MAC address and click Connect. Simplest way to make sure you have absolutely clean router is to run
