Show full item record. Abstract. The proposed Fifth Edition of API 618 (“Reciprocating Compressors for Petroleum, Chemical, and Gas Industry Services”) incorporates significant changes in the section concerning pulsation and vibration control. There are still to be three “design approaches,” but the requirements to perform certain analyses that were presented as optional in the Fourth Edition will now be dependent on pressure pulsation and for levels determined from the acoustical ...

API STD 618 - International Design & Technical Standards

Their standpoint is that API 618 does not state that the compressor has to be designed to run at this minimum requirement, simply that the criteria should be met. The same requirement existed on the 3rd edition of API 618, and my understanding is that it will be kept unchanged on the forthcoming 5th edition.
