...

While there are numerous considerations with regards to fire pump positioning and installation within a building, per NFPA 20 and the IBC some major items to remember include: The location of and access to the fire pump room must be pre-planned with the fire department.

### **Fire Pump Installation Requirements - DBR Inc.**

NFPA 20 has traditionally treated fire pumps as individual units and made requirements accordingly. Even in applications such as refineries and aircraft hangers, where multiple fire pumps must operate to supply the full demand, NFPA 20 requires an independent controller, pump test header, and pressure relief valve (if required) for each unit.
