## **Osha Requirements For Warehouse Racking**

The truth is, when it comes to warehouse racking safety guidelines, OSHA doesn't offer much guidance. There are only two applicable rules: 1910.176(b) , which effectively states that material stored in tiers must be made safe, and 1910.159 , which covers fire sprinklers and essentially requires 18 inches of clearance between the rack and the sprinkler.

### **1926.250 - General requirements for storage ...**

ANSWER: You will not find that requirement specifically stated in the federal OSHA standards. About the closest thing you could cite from the OSHA regulations would be Subpart N - Material Handling and Storage, paragraph 1910.176(b) - which states that "materials shall not create a hazard". But that would be a stretch at best.
