Inside National Payment Systems - Investopedia

A payment system is any system used to settle financial transactions through the transfer of monetary value. This includes the institutions, instruments, people, rules, procedures, standards, and technologies that make its exchange possible. A common type of payment system is called an operational network that links bank accounts and provides for monetary exchange using bank deposits.

Payment system - Wikipedia

Payment systems are used in lieu of tendering cash in domestic and international transactions and consist of a major service provided by banks and other financial institutions. Standardization has allowed some of these systems and networks to grow to a global scale, but there are still many country and product-specific systems.
