What's interesting is that this site is built to facilitate creation and sharing of e-books online for free, so there is no registration required and no fees.

Poly4 Product Handbook Sirius Minerals

POLY4 is the trademark name for polyhalite products from Anglo American's Crop Nutrients business. POLY4 is a multi-nutrient and low-chloride fertilizer suitable for organic farming. Derived from a naturally occurring mineral polyhalite, POLY4 contains four of the six essential macro nutrients required for plant growth: potassium, sulphur, magnesium and calcium.

siriusminerals.com

Independent testing examined the impact of POLY4 on the characteristics of compacted, steam and chemically granulated NPK fertilizer products. This handbook gives a summary of the actual testing results using real data and displays physical and chemical properties of MOP, urea-based and AN-based NPK products.

POLY4 | Product characteristics

Sirius produces POLY4 by extracting polyhalite — a rare evaporite mineral low in chloride — from a mine in North Yorkshire, crushing and grinding the mineral and then granulating the resulting powder using a starch binder from ADM under a patented process. ADM Fertilizer serves as the distribution partner for POLY4 in North America.
