Streaming Architecture: New Designs Using Apache Kafka and ...

Back in September of 2016, I wrote a series of blog posts discussing how to design a big data stream ingestion architecture using Snowflake. Two years ago, providing an alternative to dumping data into a Hadoop system on premises and designing a scalable, modern architecture using state of the art cloud technologies was a big deal.

Designing a Modern Big Data Streaming Architecture at ...

Streaming data is becoming a core component of enterprise data architecture due to the explosive growth of data from non-traditional sources such as IoT sensors, security logs and web applications. Streaming technologies are not new, but they have considerably matured in recent years.

4 Key Components of a Streaming Data Architecture (with

...

The transition from a large-scale monolithic application design using a large database to transactionally update and access state to a streaming microservice architecture can be difficult. Much of the difficulty can be attributed to a switch from thinking of computer programs as state-oriented to thinking of them in terms of flows.

MapR Streams A second option for a messaging system that supports the requirements of a stream-based architecture is MapR Streams. Developed as a ground-up reimplement of the Apache Kafka API, MapR Streams provides the same basic functions of Kafka but also some additional capabilities, as we'll discuss in this chapter.
