Manual Brake Conversion | Front Manual Disc Brakes

A railway brake is a type of brake used on the cars of railway trains to enable deceleration, control acceleration (downhill) or to keep them immobile when parked. While the basic principle is similar to that on road vehicle usage, operational features are more complex because of the need to control multiple linked carriages and to be effective on vehicles left without a prime mover.

Railway brake - Wikipedia

If the brake fluid level falls below the MIN mark, this indicates a leakage in the brake system or worn-out brake linings. Check the brake system and do not continue riding. (Your authorized KTM workshop will be glad to help.) Page 87: Adding Rear Brake Fluid Warning Danger of accidents Reduced braking effect caused by old brake fluid.
