reasoning.

Multiplication & division | Oxford Owl

All right, you've probably seen the pattern now. Just as multiplying by 100 was multiplying by 10 twice, multiplying by 1,000 is multiplying by 10 three times, so this is equal to 164, and I'll color-code this, times 10 times 10 times 10, so what we're going to do is shift all the digits three places to the left.

Fractions multiplying and dividing with understanding ...

So if I said, if I just moved over 3 to the right, where do I end up? 1, 2, 3. I end up at 5. So either way, you understand that 2 plus 3 is equal to 5. So what is 2 times 3? An easy way to think about multiplication or timesing something is it's just a simple way of doing addition over and over again. So that you means is, and it's a little ...

Basic multiplication (video) | Khan Academy

Dividing Fractions Dividing fractions is very similar to multiplying fractions, you even use multiplication. The one change is that you have to take the reciprocal of the divisor. Then you proceed with the problem just as if you were multiplying. Step 1: Take the reciprocal of the divisor. Step 2: Multiply the numerators.
